WE PLANT A TREE FOR EVERY CHARGER INSTALLED

Connekt are committed to helping sequester CO₂, which is why we've partnered up with more:trees

MoreTrees partner with tree planting partners across the world who work with local communities to restore healthy forests and reduce extreme poverty. By planting trees you help sequester harmful emissions while providing co-benefits such as water filtration, shelter, food sources, poverty alleviation and biodiversity.

The more trees you plant, the more you help.
